

WaveNova Partner Portal — User Guide

May 2026

1 Logging In

1. Go to **wavenova.org**
2. Click **Partner Login** in the navigation bar
3. Sign in with your Google account — use the same email address that WaveNova registered you with
4. You will be redirected to the Partner Portal automatically

Access issue? If you see "No partner org assigned to your account yet", contact **hi@wavenova.org** — your email needs to be linked to your station first.

2 Your Projects Home Screen

After logging in you land on **Your Projects**, a list of all stations assigned to your account. Each project card shows:

- Station name and status (**Operational** **Just Launched**)
- Location and category
- Total funds raised vs. goal across all active fundraising funds
- A progress bar showing overall funding percentage

Click **Manage** → on any project to open its management page.

3 Creating a New Project

To register a new station, click **+ New Project** (top right of Your Projects) and fill in the form:

FIELD	DESCRIPTION
Project Name	The station's public display name (e.g. "Selong Belanak Station")
Slug (URL)	Auto-filled from the name. Only lowercase letters, numbers, and hyphens. This becomes the page URL — it cannot be changed later
Location	City or area name shown to donors (e.g. "South Lombok")
Category	Choose "Sorting Stations" or "Waste Management"
Project Image	Upload a photo (JPG/PNG). Shown on the public project page
Operating Since	The year your station began operating (e.g. 2021)
Description	Optional — you can add or edit this later in the project editor

Click **Create Project** when ready. The project appears in your list immediately.

4 Managing a Project

Click **Manage** → on any project to open its management page. This page has four sections.

4.1 Edit Project Content

This controls what donors see on your public project page at [wavenova.org/projects/\[slug\]](https://wavenova.org/projects/[slug]).

About This Project

Write a description of your station — what you do, who you work with, and the impact you have. This is the main text donors read.

Impact Metrics

These are the teal tags donors see on your project card (e.g. **12,400 KG collected**, **6 workers employed**).

- To **add** a metric: type it in the input box and click **Add** (or press Enter)
- To **remove** a metric: click the **X** on any existing tag

Keep metrics short and specific. Good examples: "12,400 KG collected", "6 workers employed", "Operating since 2021"

Project Image

Click the upload area to replace your station photo.

Station Location

This pins your station on the interactive map at wavenova.org. Type your station's address or name in the search box and select from the autocomplete suggestions. Once selected, you'll see a confirmation with the exact coordinates.

Important: Set this accurately so donors can find your station on the map. Look up your address in Google Maps first if you're unsure of the exact name.

When done editing, click **Save Changes**. The button turns green ("Saved ✓") to confirm.

4.2 Fundraising Funds

Funds let you tell donors exactly what their money goes toward. Each fund has its own goal and progress bar visible on your project page.

Creating a Fund

FIELD	DESCRIPTION
Fund name	What the money is for (e.g. "Facility Upgrade", "Equipment Purchase", "Monthly Operations")
Goal (\$)	Target amount in USD
Description	Optional — extra detail for donors about how the money will be used

Click **Create Fund**. The new fund appears in the list immediately.

Editing a Fund

Click **Edit** next to any fund to change its name, goal, description, or status:

- Active** — visible to donors and accepting allocations
- Completed** — goal reached; mark it complete when fully funded
- Archived** — hidden from donors; use for old or cancelled funds

You can have multiple active funds at the same time. Donors can choose which fund to support when they donate.

4.3 Allocating Donations

When a donor completes a bank transfer and WaveNova confirms it, the donation appears in the **Confirmed Donations** section. Each entry shows the amount (USD), donor name (or "Anonymous"), and how many days ago it was received.

Use the dropdown next to each donation to **allocate it to a fund**. This immediately adds the amount to that fund's progress bar — the donor-facing page updates right away.

Always allocate donations promptly. Unallocated donations do not count toward any fund's progress bar, so donors cannot see the impact of their gift until you assign it.

If a donation was allocated to the wrong fund, simply select a different fund from the dropdown to reassign it at any time.

4.4 Post a Station Update

Station updates log meaningful milestones or collection events for your station. Write a short update in the text box (e.g. *"Collected 340 KG this week"* or *"New sorting equipment installed"*) and click **Post Update**.

Posted updates appear in the **Recent Updates** list below the form, newest first.

Post updates regularly — weekly or after major collection events. This creates a record of your station's activity over time.

5 Signing Out

Click **Sign out** in the top-right corner of any page in the portal.

6 Getting Help

If anything isn't working or you need access changes (e.g. adding a team member to your account):
